

IMC Sheffield Submission to the Network Meeting

1. The Drupal aggregator should be called IMC UK Network, since it's the site of the UK Network, and it should be listed in the global cities list (which all IMC sites carry) as UK Network.

3. The Drupal aggregator should use a domain name which isn't currently in use, eg:

- network.indymedia.org.uk
- net.indymedia.org.uk
- nwk.indymedia.org.uk
- uknet.indymedia.org

4. All UK IMC collectives which are members of the IMC UK Network should be asked to have a prominent link to the UK Network site and be asked to carry a feature article about the launch of the IMC UK Network.

5. The IMC UK Network site should carry the Sheffield and UK open newswire feeds and the Alt-Sheff's iCal Calendar events feed.

6. Northern IMC's Proposal about the Docs pages, (to remove the two pages and their history from the server at docs.indymedia.org) is rejected. It was felt that the questions and accusations raised have never been answered, and in the interests of openness it was best to leave the story online.
